In software engineering, multitier architecture (often referred to as n-tier architecture) or multilayered architecture is a client-server architecture in which presentation, application processing, and data management functions are physically separated. The most widespread use of multitier architecture is the three-tier architecture.. N-tier application architecture provides a model by ...

Summary. Diagrams are an essential tool for communicating information architecture and interaction design in Web development teams. This document discusses the considerations in development of such diagrams, outlines a basic symbology for diagramming information architecture and interaction design concepts, and provides guidelines for the use of these elements.

The Coding Level shown within each description is a rating from 1 to 5 to indicate how much demo coding the session will contain " 1 means none, and 5 means nothing-but.. The Advanced Level shown within each description is a rating from 1 to 5 to indicate how advanced the session is " 1 means introductory, and 5 means black-belt.

### **Agenda - Software Design & Development Conference SDD 2018**

Introduction. As part of the series of posts announced at this initial blog post (.NET Application Architecture Guidance) that explores each of the architecture areas currently covered by our team, this current blog post focuses on "Microservices and Docker containers: Architecture, Patterns and Development guidance". Just as a reminder, the four introductory blog posts of this series will ...

### **Microservices and Docker containers: Architecture**

Here I will explain about uses of 3-Tier architecture and how to create or implement 3-tier architecture for our project in asp.net

### **3 tier architecture example in asp.net with C# - ASP.NET**

VB.NET Tutorial and source code VB.NET is an update to Visual Basic that targets Microsofts .NET Framework. VB.NET has a lot of similarities to Visual Basic but also some differences.
