Synthetic biology is an interdisciplinary branch of biology and engineering.. The subject combines disciplines from within these domains, such as biotechnology, genetic engineering, molecular biology, molecular engineering, systems biology, membrane science, biophysics, chemical and biological engineering, electrical and computer engineering, control engineering and evolutionary biology.

Biorobotics covers the fields of cybernetics, bionics and even genetic engineering as a collective study.. Biorobotics may make robots that emulate or simulate living biological organisms mechanically or even chemically, or make biological organisms as manipulatable and functional as robots, or use biological organisms as components of robots.

Robert A. Freitas Jr., J.D., published the first detailed technical design study of a medical nanorobot ever published in a peer-reviewed mainstream biomedical journal and is the author of Nanomedicine, the first book-length technical discussion of the medical applications of nanotechnology and medical nanorobotics. Volume I was published in October 1999 by Landes Bioscience while Freitas was ...

Prof. Dr. Damjana Drobne is head of Bionanoteam, the Research group for nanobiology and nanotoxicology at the Biotechnical faculty, University of Ljubljana. With over twenty years of research experience, she is a full professor of Zoology and Toxicology, and the Vice head of the Department of biology. Her group Bionanoteam conducts research in large EU-funded research projects.

Open Access journals are the major source of knowledge for young and aspiring generations who are keen in pursuing a career in sciences. This system provides easy access to networks of scientific journals. Authors that contribute their scholarly works to Open Access journals gain remarkable reputation as the research scholars explore these works extensively.
