Assume that the function $f(z, t)$ satisfies the following conditions: (i) $f(z, t)$ is a continuous function of both variables, (ii) For each fixed value of t , $f(z, t)$ is a holomorphic function of z , (iii) The integral $F(z) = \int f(z, t) dt$ converges uniformly at both limits in any compact set in D . More fully, Euler's integral of the second kind.
