plants and the composition of plant communities. Hard-hoofed animals, such as cattle, horses and sheep, trample native vegetation and compact the soil, which prevents seedling growth and encourages soil erosion. Many native plants cannot survive intense grazing by these introduced animals. Invasive species have had devastating effects on our native plants.

FACT SHEET Threatened Australian plants

The Australian native food industry is an emerging industry, which aims to utilise our country's natural assets to develop new sources of income, both domestically and via export. To date, the industry has largely been based on the wild harvest of produce, however this

Cultivation of Native Food Plants in South- eastern Australia

interest in native plants is a recent development (Western Australia excepted). Members of the Societies for Growing Australian Plants and Wildflower Societies around Australia were aware of the deficiencies and in 1981 founded the Australian
