Improving nutrition through enhanced food environments POLICY BRIEF No. 7 | May 2017 Food systems are failing to deliver secure access to safe, high-quality diets for everyone.

## **Improving nutrition through enhanced food environments**

Given the strength of the evidence, attention should now shift to an action-oriented agenda for scaling biofortification to improve nutrition globally. To reach one billion people by 2030, there are three key challenges: 1) mainstreaming biofortified traits into public plant breeding programs; 2) building consumer demand; and 3) integrating biofortification into public and private policies, programs, and investments.
