"Dynamic Tension" is the name Charles Atlas gave to the system of physical exercises that he first popularized in the 1920s. Dynamic Tension is a self-resistance exercise method which pits muscle against muscle. The practitioner tenses the muscles of a given body part and then moves the body part against the tension as if a heavy weight were being lifted.

Dynamic type checking is the process of verifying the type safety of a program at runtime. Implementations of dynamically type-checked languages generally associate each runtime object with a type tag (i.e., a reference to a type) containing its type information. This runtime type information (RTTI) can also be used to implement dynamic dispatch, late binding, downcasting, reflection, and ...

Tensile strength is a measurement of the force required to pull something such as rope, wire, or a structural beam to the point where it breaks.. The tensile strength of a material is the maximum amount of tensile stress that it can take before failure, for example breaking.. There are three typical definitions of tensile strength: Yield strength - The stress a material can withstand without ...
