In the final equation-2 we have determined the value of constant K. Now the value of t is to be determined. The fault current (ISC) in the above equation varies with time. However, calculating the exact value of the fault current and sizing the power cable based on that can be complicated. To simplify the process the cable can be sized based on the interrupting capability of the circuit breakers ...

Apart from their electrical conductivity, the other technologically important properties of copper and aluminium differ so significantly (density is an obvious example) that their areas of application are and have always been clearly distinct.

Copper or aluminium? Which one to use and when?

Choosing Electrical optional. Electrical is highly rewarding optional but it is also hectic in terms of efforts needed. As there is no availability of ready-made material, you have to rely on reference books for completion of a topic.
