Science Olympiad is an American team competition in which students compete in 23 events pertaining to various scientific disciplines, including earth science, biology, chemistry, physics, and engineering. Over 7,800 middle school and high school teams from 50 U.S. states compete each year. U.S. territories do not compete; however, since 2012 high school teams from Japan have competed at the ...

FORCES . A force is any push or pull that causes an object to move, stop, or change speed or direction.; The greater the force, the greater the change in motion will be. The more massive an object, the less effect a given force will have on the object.; Unless acted on by a force, objects in motion tend to stay in motion and objects at rest remain at rest.

Ruthenium is a chemical element with symbol Ru and atomic number 44. It is a rare transition metal belonging to the platinum group of the periodic table. Like the other metals of the platinum group, ruthenium is inert to most other chemicals. Russian-born scientist of Baltic-German ancestry Karl Ernst Claus discovered the element in 1844 at Kazan State University and named it after the Latin ...

During microwave and high frequency heating, many variables in the food affect the heating performance. Among the most significant is the permittivity of the food, which describes how a material interacts with microwaves.

If you are using a science journal to record your child's experiments, then you can have them record either the process of making each type of rock or draw a picture of what they looked like at the end (or both). What's Happening? There are three types of rocks (sedimentary, metamorphic, and igneous) which, given the right conditions, can be changed from one into another.

RECURRING SCIENCE MISCONCEPTIONS IN K-6 TEXTBOOKS William J. Beaty 3/1995 WARNING: This file is currently being written, edited, corrected, etc. It does still contain some mistakes of its own. I placed it online as a sort of 'trial by fire' in order to hear readers' responses so I could target weak or unclear sections

for improvement.
