An IPv6 address can be statically configured by a human operator. However, manual assignment is quite open to errors and operational overhead due to the 128 bit length and hexadecimal attributes of the addresses, although for router interfaces and static network elements and resources this can be an appropriate solution.

GoBGP " A Control Plane Evolving Software Networking. If I have talked to you over the past year or two about networking, odds are I have mentioned a project to you called GoBGP. If we have spoken a lot, you are probably sick of me talking to you about GoBGP There is a reason, it's because GoBGP is a missing link in networking that has been for a long time.

GoBGP - A Control Plane Evolving Software Networking

Note that in order to use this command, you need to have access to the repository with debugging packages. If your system is registered with Red Hat Subscription Management, enable the rhel-6-variant-debug-rpms repository as described in Section 8.4.4, "Viewing the Current Configuration". If your system is registered with RHN Classic, subscribe the system to the rhel-architecture-variant-6 ...
