This LED lighting control reference design demonstrates a unique approach to drive and control a string of multiple high-power light-emitting diodes (LEDs). This reference design is targeted for industrial machine vision systems and is also suitable for other industrial or automotive lighting ...

A machine (or mechanical device) is a mechanical structure that uses power to apply forces and control movement to perform an intended action. Machines can be driven by animals and people, by natural forces such as wind and water, and by chemical, thermal, or electrical power, and include a system of mechanisms that shape the actuator input to achieve a specific application of output forces ...

Design for manufacturability (also sometimes known as design for manufacturing or DFM) is the general engineering practice of designing products in such a way that they are easy to manufacture. The concept exists in almost all engineering disciplines, but the implementation differs widely depending on the manufacturing technology.

Weighing only 10 ounces and small enough to get lost in your laptop bag, the Z1 is the smallest, lightest, most portable CPAP in the world. Z1 is a premium portable CPAP with a wide pressure range, whisper quiet motor, compliance capabilities, auto altitude adjustment, automatic leak compensation, an optional integrated battery, a 3-year warranty, and more.
