Abstract" The main aim of this paper is to design the steering system for a formula SAE vehicle. The main focus is to design a steering system such as to counter bump and roll steer and ensure proper response to high speed and low speed turns.

Optimization of Bleaching Process Introduction. The bleaching of edible oils and fats is a part of the refining process of crude oils and fats, which removes contaminants that adversely impact the appearance and performance of these triglyceride (triacylglycerol)-based materials.

An exhaust system is usually piping used to guide reaction exhaust gases away from a controlled combustion inside an engine or stove.The entire system conveys burnt gases from the engine and includes one or more exhaust pipes.Depending on the overall system design, the exhaust gas may flow through one or more of:

Monte Carlo methods (or Monte Carlo experiments) are a broad class of computational algorithms that rely on repeated random sampling to obtain numerical results. Their essential idea is using randomness to solve problems that might be deterministic in principle. They are often used in physical and mathematical problems and are most useful when it is difficult or impossible to use other approaches.
