Data Mining and Statistics. There is a great deal of overlap between data mining and statistics. In fact most of the techniques used in data mining can be placed in a statistical framework.

### **What Is Data Mining? - Oracle**

Data mining is the process of discovering patterns in large data sets involving methods at the intersection of machine learning, statistics, and database systems. Data mining is an interdisciplinary subfield of computer science and statistics with an overall goal to extract information (with intelligent methods) from a data set and transform the information into a comprehensible structure for ...
