out of the cocoon pdf

A cocoon is a casing spun of silk by many moths and caterpillars, and numerous other holometabolous insect larvae as a protective covering for the pupa.. Cocoons may be tough or soft, opaque or translucent, solid or meshlike, of various colors, or composed of multiple layers, depending on the type of insect larva producing it.

Cocooning is staying inside one's home, insulated from perceived danger, instead of going out. The term was coined in 1981 by Faith Popcorn, a trend forecaster and marketing consultant. It is used in social science, marketing, parenting, economic forecasting, self-help, religion, and has become part of standard English as defined by multiple dictionaries.
