Basic principles. The notion of Logotherapy was created with the Greek word logos ("reason"). Frankl's concept is based on the premise that the primary motivational force of an individual is to find a meaning in life.

### **Logotherapy - Wikipedia**

Male predominance is particularly strong in this type of esophageal cancer, which occurs about 7 to 10 times more frequently in men. This imbalance may be related to the characteristics and interactions of other known risk factors, including acid reflux and obesity.. The long-term erosive effects of acid reflux (an extremely common condition, also known as gastroesophageal reflux disease or ...

Un cancer (ou tumeur maligne) est une maladie caractérisée par une prolifération cellulaire anormalement importante au sein d'un tissu normal de l'organisme, de telle manière que la survie de ce dernier est menacée. Toutes ces cellules découlent d'un même clone, cellule initiatrice du cancer qui a acquis certaines caractéristiques lui permettant de se diviser indéfiniment.

Abstract. In the past decades, our knowledge about the relationship between cancer and the immune system

has increased considerably. Recent years' success of cancer immunotherapy including monoclonal antibodies (mAbs), cancer vaccines, adoptive cancer therapy and the immune checkpoint therapy has revolutionized traditional cancer treatment.

### **Current status and future directions of cancer immunotherapy**

Cancer is so difficult to cure because it is so profitable to treat. **CANCER THERAPY - A New Direction.** Walter Last. The present emphasis in cancer therapy is to destroy tumours, and all research focuses on finding new ways for doing this.

### **CANCER THERAPY – A New Direction: - Health - Science**

The unprecedented rise and success of cancer immunotherapy over the past decade – a direct result of the concept of immunosurveillance – has revolutionized the clinical management of a wide array of malignancies that were previously endowed with dismal prognosis.

### **Resistance Mechanisms to Immune-Checkpoint Blockade in**

The generation of immunity to cancer is a cyclic process that can be self propagating, leading to an accumulation of immune-stimulatory factors that in principle should amplify and broaden T cell responses.

### **Oncology Meets Immunology: The Cancer-Immunity Cycle**

Immunotherapy with PD-1 or PD-L1 blockade fails to induce a response in about 80% of patients with unselected non-small cell lung cancer (NSCLC), and many of those who do initially respond then develop resistance to treatment.

Purpose: A call for research that evaluates the impact of the many changes now occurring in the healthcare system with a particular focus on cancer prevention, control, and treatment. Efforts focusing on improving access to care may also impact inequities that contribute to health disparities. New health public policy initiatives such as the new federal and state marketplaces that have expanded ...

### **More In Our Research Programs - American Cancer Society**

In March 2014, ASCO published its inaugural State of Cancer Care in America report, with the goal of increasing awareness among policymakers and the larger cancer community about improvements and current challenges in the delivery of high-quality cancer care, as well as about emerging issues that are likely to require future attention.
