Graph functions expressed symbolically and show key features of the graph, by hand in simple cases and using technology for more complicated cases.

MAFS.912.F-IF.3.7 - Graph functions expressed symbolically

Precalculus: An Investigation of Functions (2nd Ed) David Lippman and Melonie Rasmussen. Precalculus: An Investigation of Functions is a free, open textbook covering a two-quarter pre-calculus sequence including trigonometry. The first portion of the book is an investigation of functions, exploring the graphical behavior of, interpretation of, and solutions to problems involving linear ...

In practice, the graphical method is complicated and impractical for complex circuits. Another method of modelling a diode is called piecewise linear (PWL) modelling. In mathematics, this means taking a function and breaking it down into several linear segments.

A linear congruential generator (LCG) is an algorithm that yields a sequence of pseudo-randomized numbers calculated with a discontinuous piecewise linear equation. The method represents one of the oldest and best-known pseudorandom number generator algorithms. The theory behind them is relatively easy to understand, and they are easily implemented and fast, especially on computer hardware ...

Section 3-1 : Basic Concepts. In this chapter we will be looking exclusively at linear second order differential equations. The most general linear second order differential equation is in the form.

Here is a set of notes used by Paul Dawkins to teach his Algebra course at Lamar University. Included area a review of exponents, radicals, polynomials as well as indepth discussions of solving equations (linear, quadratic, absolute value, exponential, logarithm) and inqualities (polynomial, rational, absolute value), functions (definition, notation, evaluation, inverse functions) graphing ...

(Section 2.3: Limits and Infinity I) 2.3.3 x can only approach from the left and from the right. (It is now harder to apply our motto, "Limits are Local." Abstractly, we could consider the behavior of f on a sort of left-neighborhood of a , or on a sort of right-neighborhood of a .)
