Biotechnology is the broad area of biology involving living systems and organisms to develop or make products, or "any technological application that uses biological systems, living organisms, or derivatives thereof, to make or modify products or processes for specific use" (UN Convention on Biological Diversity, Art. 2). Depending on the tools and applications, it often overlaps with the ...

**KEY BIOTECHNOLOGY INDICATORS (December 2011)**

Biotechnology is a powerful enabling technology that has the potential to revolutionise many industries, including agriculture. Biotechnology offers benefits for farmers, the food manufacturing industry, consumers and the community; and the department supports the development and use of biotechnology that has been assessed as safe.
