Codex Alimentarius Commission. Procedural Manual: 24th Edition

Nutrition is the science that interprets the interaction of nutrients and other substances in food in relation to
maintenance, growth, reproduction, health and disease of an organism. It includes food intake, absorption,
assimilation, biosynthesis, catabolism, and excretion. The diet of an organism is what it eats, which is largely
determined by the availability and palatability of foods.

Transthyretin (TTR or TBPA) is a transport protein in the serum and cerebrospinal fluid that carries the
thyroid hormone thyroxine (T₄) and retinol-binding protein bound to retinol.This is how transthyretin gained
its name: transports thyroxine and retinol.The liver secretes transthyretin into the blood, and the choroid
plexus secretes TTR into the cerebrospinal fluid.

Transthyretin - Wikipedia
