programming elastic mapreduce using pdf

Apache Hadoop (/ h É™ Èˆ d uË• p /) is a collection of open-source software utilities that facilitate using a network of many computers to solve problems involving massive amounts of data and computation. It provides a software framework for distributed storage and processing of big data using the MapReduce programming model. Originally designed for computer clusters built from commodity ...

In computing, Hazelcast IMDG is an open source in-memory data grid based on Java. It is also the name of the company developing the product. The Hazelcast company is funded by venture capital and headquartered in Palo Alto. In a Hazelcast grid, data is evenly distributed among the nodes of a computer cluster, allowing for horizontal scaling of processing and available storage.

Hazelcast - Wikipedia

IterableCSVToBean and IterableCSVToBeanBuilder have both been deprecated. CsvToBean itself is now iterable; use it instead. All constructors except the ones with the smallest (often nullary, using defaults for all values) and largest argument lists (which often have only package access) have been deprecated.
