Psychology is the science of behavior and mind, including conscious and unconscious phenomena, as well as feeling and thought. It is an academic discipline of immense scope and diverse interests that, when taken together, seek an understanding of the emergent properties of brains, and all the variety of epiphenomena they manifest. As a social science it aims to understand individuals and groups ...

The state of flow has been rarely investigated from a neuropsychological perspective but is a growing interest. According to Dietrich, it has been associated with decreased activity in the prefrontal cortex.. The prefrontal cortex is an area responsible for higher cognitive functions such as self-reflective consciousness, memory, temporal integration, and working memory.
