In the field of microwave engineering and circuit design, the Wilkinson Power Divider is a specific class of power divider circuit that can achieve isolation between the output ports while maintaining a matched condition on all ports. The Wilkinson design can also be used as a power combiner because it is made up of passive components and hence reciprocal.

RTL-SDR and GNU Radio with Realtek RTL2832U [Elonics E4000/Raphael Micro R820T] software defined radio receivers. Originally meant for television reception and streaming the discovery and exploitation of the separate raw mode used in FM reception was perhaps first noticed by Eric Fry in March of 2010 and then expanded upon by Antti Palosaari in Feb 2012 who found that these devices can output ...

The MRFX1K80H is based on NXP's Xtra High Voltage LDMOS technology, designed for drain voltages up to 65V. This technology enables; fewer transistors to combine in high power systems, ease of matching to 50 Ohms, lower overall system losses, and further improvements in ruggedness.

This TV antenna combiner merges the signals from a UHF antenna with a VHF antenna on the same down lead cable. As a leader in cutting-edge antenna technology, Antennas Direct is dedicated to providing superior products supported by a robust warranty and a world class call center located in St. Louis, MO.

An astronomical interferometer is an array of separate telescopes, mirror segments, or radio telescope antennas that work together as a single telescope to provide higher resolution images of astronomical objects such as stars, nebulae and galaxies by means of interferometry. The advantage of this technique is that it can theoretically produce images with the angular resolution of a huge ...
