Deep learning (also known as deep structured learning or hierarchical learning) is part of a broader family of machine learning methods based on learning data representations, as opposed to task-specific algorithms. Learning can be supervised, semi-supervised or unsupervised.. Deep learning architectures such as deep neural networks, deep belief networks and recurrent neural networks have been ...

Neuro-linguistic programming (NLP) is an approach to communication, personal development, and psychotherapy created by Richard Bandler and John Grinder in California, United States in the 1970s. NLP's creators claim there is a connection between neurological processes (neuro-), language (linguistic) and behavioral patterns learned through experience (programming), and that these can be changed ...

Heather, I agree completely with what you say in your article. I have to say though, that what worries me even more are the situations in which parents load their children up with so many extra curricular activities, that all the time that would normally be free time is so structured and goal oriented that in the end the child is not able to play in an unstructured environment and ultimately ...
