

## **stamping dies metal forming pdf**

Stamping (also known as pressing) is the process of placing flat sheet metal in either blank or coil form into a stamping press where a tool and die surface forms the metal into a net shape. Stamping includes a variety of sheet-metal forming manufacturing processes, such as punching using a machine press or stamping press, blanking, embossing, bending, flanging, and coining.

Bennett Machine & Stamping Company specializes in custom metal stamping and deep drawing of parts that range from canisters to sensor components. An inventory of about 30 stamping machines in capacities from 20 to 400 tons enables us to meet your thin/heavy gauge, short/long run, bulk, complex, or prototype requirements.

Whip City Tool & Die Corporation is an industry leader in designing quality tools & dies for custom precision metal stampings using fourslide, multislide & vertislide machines.

## **Whip City Tool & Die Corporation - Metal Stampings**

A stamping press is a metalworking machine tool used to shape or cut metal by deforming it with a die. In simple terms, a stamping press is the modern day equivalent of a hammer and anvil. The difference is that a stamping press uses precision-made male and female dies to dictate the shape of the final product.
