Economic growth is the increase in the inflation-adjusted market value of the goods and services produced by an economy over time. It is conventionally measured as the percent rate of increase in real gross domestic product, or real GDP.. Growth is usually calculated in real terms - i.e., inflation-adjusted terms “ to eliminate the distorting effect of inflation on the price of goods produced.

As the primary objective of this study is to review education policies that improve the quality of learning of basic education students in developing countries, we only included studies that focused on student achievement test scores as impact outcomes.

What works to improve the quality of student learning in

John Hattie developed a way of synthesizing various influences in different meta-analyses according to their effect size (Cohen's d). In his ground-breaking study "Visible Learning" he ranked 138 influences that are related to learning outcomes from very positive effects to very negative effects. Hattie found that the average effect size of all the interventions he studied was 0.40.
