RF & Wireless Layout. Radio Frequency or RF designs are often infamous as "black magic". This belief exists because the fundamental mechanisms of how RF energy is developed within a printed circuit board is not well understood by many.

## **PCB Layout Examples - Printed Circuit Boards**

Warren County PCB Landfill was a PCB landfill located in Warren County, North Carolina, near the community of Afton south of Warrenton. The landfill was created in 1982 by the State of North Carolina as a place to dump contaminated soil as result of an illegal PCB dumping incident. The site, which is about 150 acres (0.61 km 2), was extremely controversial and led to years of lawsuits.

Vias make electrical connections between layers on a printed circuit board. They can carry signals or power between layers. For backplane designs, the most common form of vias use plated through hole (PTH) technology.

Design for manufacturability (also sometimes known as design for manufacturing or DFM) is the general engineering practice of designing products in such a way that they are easy to manufacture. The concept exists in almost all engineering disciplines, but the implementation differs widely depending on the manufacturing technology.
