Nature is a British multidisciplinary scientific journal, first published on 4 November 1869. It is one of the most recognizable scientific journals in the world, and was ranked the world's most cited scientific journal by the Science Edition of the 2010 Journal Citation Reports and is ascribed an impact factor of 40.137, making it one of the world's top academic journals.

### **Nature (journal) - Wikipedia**

Nature, in the broadest sense, is the natural, physical, or material world or universe. "Nature" can refer to the phenomena of the physical world, and also to life in general. The study of nature is a large, if not the only, part of science. Although humans are part of nature, human activity is often understood as a separate category from other natural phenomena.

The four volumes have been written so that each stands alone as an independent book, and may be read without benefit of the others. The full meaning of the four books, and the architectural, social, and cosmological scheme they introduce, can only be understood by seeing the interplay of these four complementary points of view.
